ABOUT ME

Beginner web developer with a passion for frontend.

My primary skill is **React**. I have been using React since February 2020 alongside with other libraries from ecosystem, such as Redux, React Router, Material UI, and Formik in my pet projects. Gained experience with class components and hooks (useState, useEffect).

Regarding markup skills, I have experience and knowledge in HTML/CSS using semantics, BEM methodology, CSS preprocessors (SASS), Material UI, and Gulp for tasks automation.

I am a responsible and conscientious person who is familiar with acting as a team player. While working as a tester, was in charge of responsibilities of QA team lead, run stand-up meetings and retrospectives, and conducted knowledge transfer sessions.

My GitHub profile is in header (only pinned repositories).

Technologies and tools:
– Linux and terminal
– OOP and design patterns (strategy, observer, adapter)
– PostreSQL (pgAdmin), MongoDB
– Visual Studio Code, Sublime Text

Processes:
– Jira, Confluence
– Agile Scrum, Scrumban
– Git workflow

`JAVASCRIPT` `REACT` `REDUX` `HTML` `CSS` `SASS` `GIT` `LINUX`

EXPERIENCE

06/20 – present **Support specialist / Go developer** **Fortebank, Nur-Sultan**

Software maintenance
Developed data migration service from CSV file to ElasticSearch
Implemented mechanism of working with aliases in ElasticSearch using using olivere/elastic library

```
WebMethods  /  Go  /  ElasticSearch
```

06/19 – 03/20 **QA engineer** **EPAM Kazakhstan**

Acted as a Tester
Interacted with Development (frontend/backend), Business Analyst, and Support teams
